

Morpheus One

ExHBR® (Extreme High Bit Rate) Audio-Video Server / Video Player / Two Audio Zones
Small Form – Multifunctional Performance

Item Number MAV-AIO

Morpheus One

Multifunctional Features – Slim Size – 20X20X5 CM

The Morpheus One is an all in one server and player that streams and plays all HD video formats in 1080P and HD audio. It is designed for versatile performance and fast playback. It plays all content streamed to it internally or from an external Server.

Features

Movie Server – Built-in movie server capable of streaming to 3 additional external native players, organizing and auto metadata tagging of all popular media

Movie Transcoder – Internal transcoder capable of supporting an external Apple TV, Roku or Third party compatible player

Movie Player – Native FullHD 1080P movie player

Music Server – Powerful music server capable of playing local and online content including many favorite streaming apps including Deezer, Tidal, Spotify, SoundCloud, Pandora and Tune-In Radio just to name a few.*

Music Players – Two independent audio zone players at 24bit / 96KHz

Air Play Receivers – Two built-in independent airplay receivers.

EasyNAS – Easily connect to an external NAS for expandable storage with free unlimited licensing.

*Some may require paid premium subscription and are dependent on 3rd party plugins.

Tech Specs

The Morpheus One utilizes an Intel Quad Core processor with a fast SSD drive running robust Linux and 4 TB internal storage. It's fanless and completely quiet.

Remote Administration

The Morpheus One is designed for the professional with remote administration and integration into major Home Automation Systems.
